Bobcats are meat-eating wildcats that are quite common in North America. However, despite their large population numbers, they are rarely seen by humans, perhaps because they are nocturnal. These elusive animals are approximately twice the size of domestic house cats. Their furry coats are usually brown or a brownish red color. Bobcats are extremely powerful hunters, and are capable of capturing prey much larger than themselves. They sneak up on prey and jump on their victims at the last minute, with leaps of up to 3 meters. Bobcats are solitary animals. Unlike dogs or wolves, who travel in packs, bobcats travel and hunt alone.

Summary:

Bobcats are \_\_\_\_ [A] \_\_\_\_, undomesticated cats that are populous in North America. They do not often get spotted by people. Most bobcats have brown or brownish fur. [1] The famous Sistine Chapel, in the Vatican, Italy, was built in 1481. It was immediately filled with beautiful artwork by master artists. By 1512, the Michelangelo had painted the famous ceiling. In 1541, the last artwork by the artist Rafael was finished. These precious artworks lasted centuries. However, by the 1980s, a problem was clear. The artworks had probably lost a lot of their original colors. The decision was made to clean and restore the art.

[2] This was extremely controversial. Supporters of the restoration noted that there were centuries of water damage to the ceiling. The water damage had created cracks. The cracks had let salt through, which had whitened the paintings. However, art historians noted that the restoration may have altered the paintings significantly from their original state. It is not always clear what techniques a master painter like Michelangelo was using. Modern restorers must make guesses about the intention of the original artists. Critics of the decision to restore the paintings worried that some of those guesses were wrong.

[3] In short, art restoration in general is often controversial. However, when it comes to paintings as important as those in the Sistine Chapel, the controversies have been endless.
